

PROJECT: _____
 TYPE: _____
 PRODUCT: _____
 APPROVED BY: _____

LV3

PRODUCT FEATURES

- Provides lighting control interface to a pillow speaker, bed side rail or other low voltage devices
- Two loads independently (on/off) with 0-10V dimming control and a third load independently (on/off)
- Approved for use with most nurse call systems that use a switch with normally-open momentary dry contacts for auxiliaries
- Wall switch, pillow speaker, bedside controllers, and additional accessories by others

SPECIFICATIONS

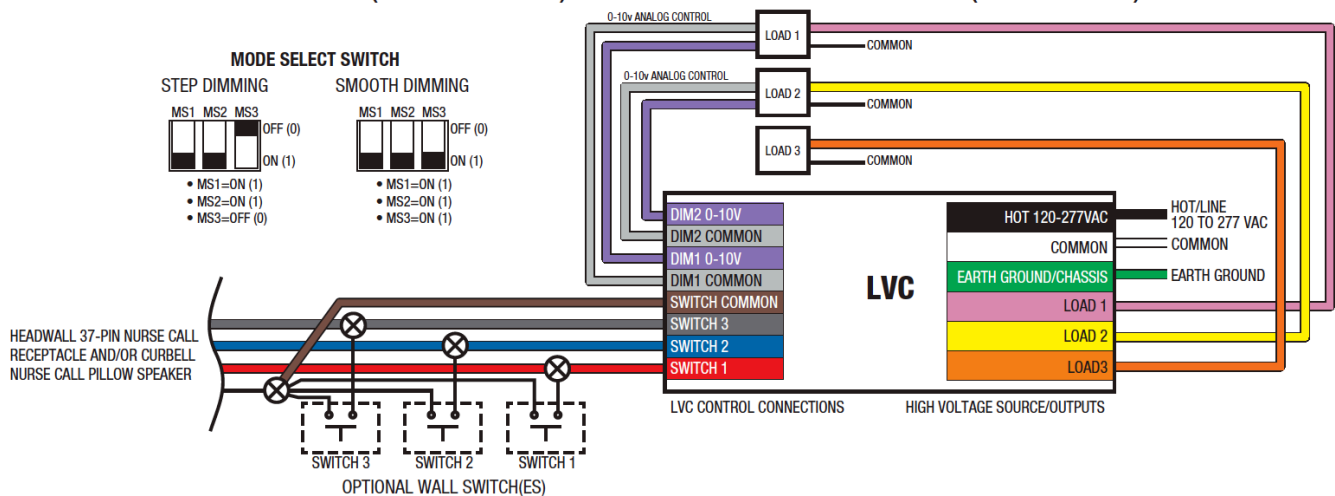

INPUT VOLTAGE: 120-277VAC 50/60HZ

CONTROL MODE: The LV3 is factory set to operate three independent loads. Two loads (typically ambient and reading) with 0-10V dimming control, and the third load independently for on/off control (typically exam). The third independent load (typically exam) can be operated on a low voltage controller or through a high voltage wall switch.
